Most-Cited Publications (73 publications cited, by citing records)

*73 publications attract 520 external citing records (mean 7.1, median 4 per cited publication; the most-cited attracts 60). The author h-index computed over this citing set is **11**. The **Cites** column matches the per-publication cited-by figures in the listing above; each index column shows how many of its citing works appear in a venue carrying that index and, in parentheses, that count as a percentage of its own citing records (Sc = Scopus, WoS = WoS Core, AJG, ABDC, FNEGE, EL = EconLit; point-in-time) — so a high percentage flags a publication whose citations concentrate in ranked outlets. The bottom row gives the index totals (matching the headline counts) with each share of all citing records.*

Citing Journals Indexed in AJG / ABDC / Sc / WoS / FNEGE / EconLit (139 journals, alphabetical)

Sc Q = Scopus (Scimago) best quartile; WoS IF = Journal Impact Factor (point-in-time where recorded on the citing work, otherwise the latest JCR 2024 release). A • marks WoS indexing whose JIF is unresolved. Throughout, WoS denotes the Web of Science Core Collection; publications indexed only in Web of Science Other Collections (such as the Journal of Wine Research article) are counted under Scopus. AJG / ABDC / FNEGE / EconLit reflect the latest local ranking lists. The final column counts the citing works each journal hosts.
