

ACCREDITED LECTURER: DIMOS CHATZINIKOLAOU

COLLABORATIVE PARTNER: MEDITERRANEAN COLLEGE

As an Accredited Lecturer you now have access to the University of Derby On-Line (UDo) and Blackboard facilities.

UDo & BLACKBOARD

Your UDo account details are as follows:

Account Username: **OS4106**

Initial Password (Please change on your first visit): **Emailed directly by IT**

Don't get locked out! Set up security questions so that you can recover your account if you lose or forget your password: Visit <https://password.derby.ac.uk/QPMUser/> and follow the on-screen instructions for creating account recovery options (security questions) or changing your password to something more memorable – your password must contain a combination of letters and numbers and expires every three months.

UDo and Blackboard will allow you to view course resources, lecture notes and discussion forums relating to your subject area (dependent on the programme/s you have involvement with).

To access UDo, open the University web site at www.derby.ac.uk and from the bottom of the home page select 'Udo' (entering the details above to login). Alternatively, go to <https://udo.derby.ac.uk/>

To access Blackboard, first login to UDo then select the 'Course Resources' tile. The Blackboard screen will show you the programme(s) and module(s) you are registered to teach on.

Once logged in to UDo, you will also be able to access the University's Electronic Library system. (Note: Some areas of UDo are restricted to University staff only and so you may not be able to access all screens)

*If you need to be added to any modules or require general help with your account, please email uodpartnerships@derby.ac.uk quoting your account name (as detailed above) and including full details of the problem you are experiencing. If you have any issues accessing your UDo account, please contact our IT Service Centre itservicecentre@derby.ac.uk, or call +44 1332 591234, quoting your account username. **Please note that when contacting the Partnerships Department or IT Service Centre you should not include details of your current or old password.***
